

Analyze a Case Study

Name: _____

Class/Period: _____

Instructions:

1. Read section 1 of *Sickle Cell Anemia* from the National Center for Case Study Teaching in Science, University at Buffalo, State University of New York.
2. Work in groups to identify the experimental evidence described in the case study.
3. List all experimental evidence in the chart below, and for each piece of evidence, describe its significance.
4. Answer analysis questions at the end of section 1 of the case study.
5. Complete sections 2A, 2B, and 2C of the case study as instructed by your teacher.

Experimental Evidence	Significance

DR. RUPNATHJY (DR. RUPAKNATH)
